***Allowable Subject Matter***

Claims 1-25 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to tracking of individuals in a flock by means of radio communication and positioning systems. Each independent claim identifies the uniquely distinct features "A system of tracking individuals divided into one or more flocks comprising at least one individual flock leader in each flock, being provided with a first electronic device including a position tracker and radio communication equipment, the radio communication equipment includes at least first transceiver operating in a public radio communication network, and a second transceiver operating in a short distance radio system, at least one other individual belonging to a flock being provided with the second electronic device, said second electronic device including at least a third transceiver also operating in the short distance radio system and being arranged to communicate with the second transceiver of said radio communication equipment, each second electronic device being arranged to transmit at least an identification code uniquely identifying said second device to a first electronic device present in the flock through the short distance radio system, thereby indicating the presence of associated individual in a flock". The cited prior art fail to anticipate or render the above limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art of O'Donnell et al. (US 2005/0200487), Fong et al. (US 7,061,385) and Curkendall (US 6,346,885) are cited to show a variety of group tracking and monitoring systems.
